
QGIS TUTORIAL

source: radical cartography

OBJECTIVES

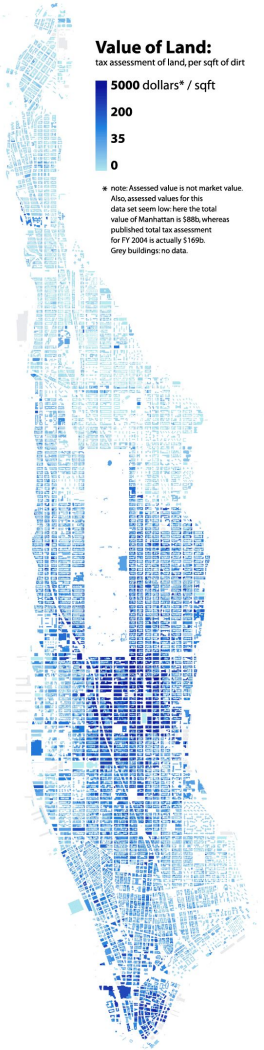
1. understand the main uses of GIS technologies, types of data involved, and ways the three dimensional world is projected onto two dimensional surfaces.

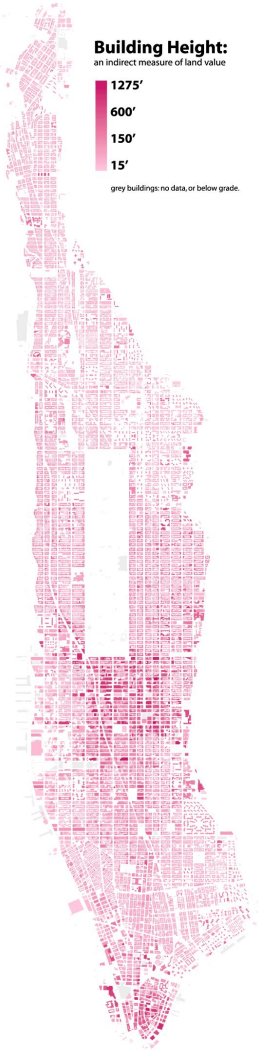
2. become familiar with QGIS software.

3. become familiar with the basic conventions of map-making and map legibility.

4. learn to access, download and display spatial data.

5. learn basic analysis in QGIS, and how to export map layouts.





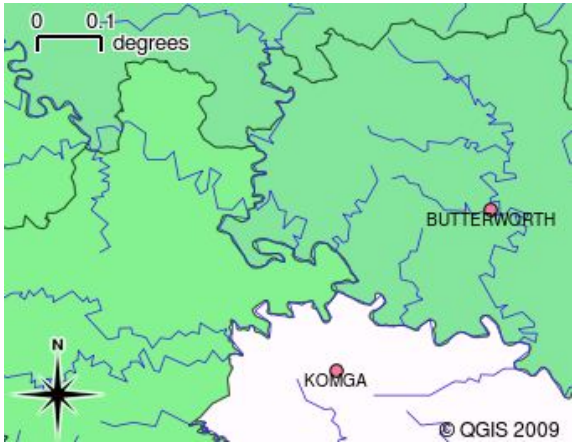
WHAT IS GIS? WHY IS IT USEFUL?

“Just as we use a word processor to write documents and deal with words on a computer, we can use a **GIS application** to deal with **spatial information** on a computer. GIS stands for **‘Geographical Information System’**.”

Different ways students use GIS data - environmental sciences, biology, sustainable development, urban studies, architecture, history, and economics.

First rule of geography:
"Everything is related to everything else, but near things are more related than distant things."

TYPES OF DATA



VECTOR DATA
read as a shapefile, .shp
or a feature class in a .gdb

RASTER DATA
can be an image like a .tif,
or even a .jpg

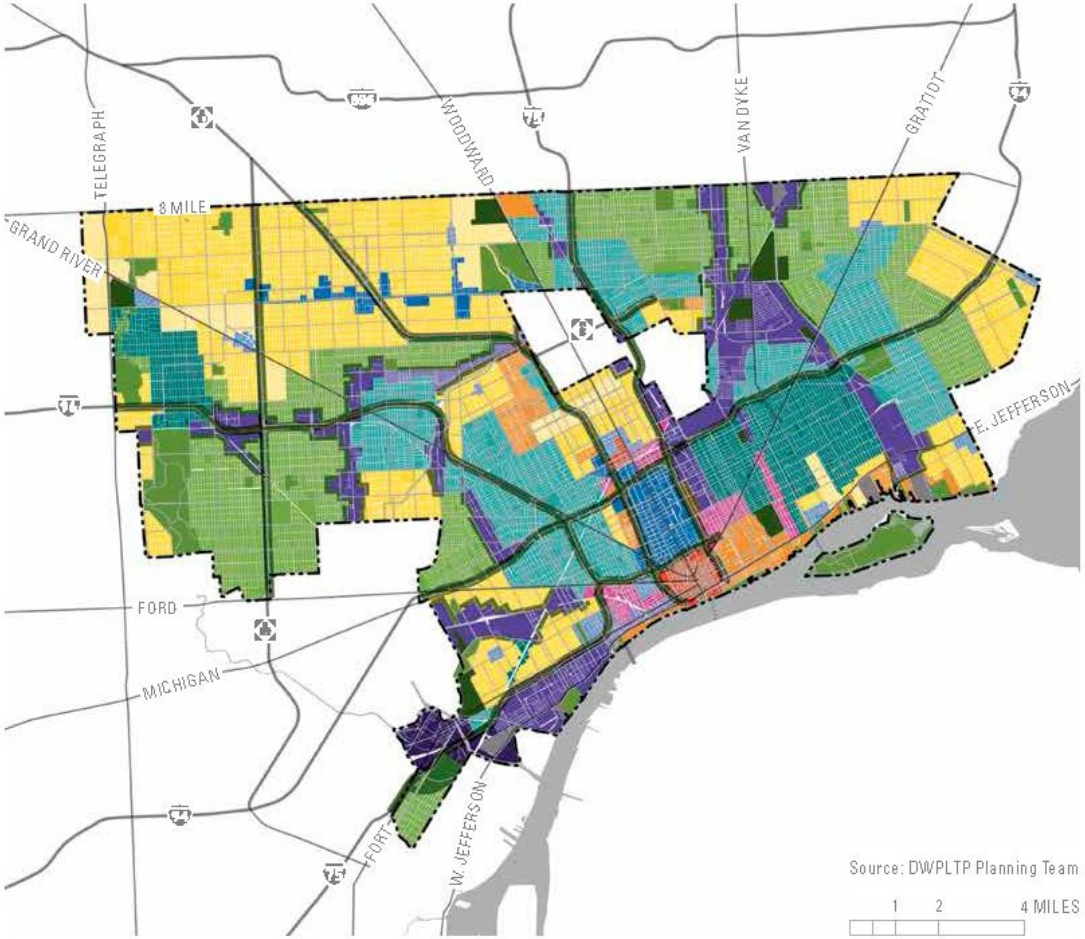
WHEN MAPS LIE

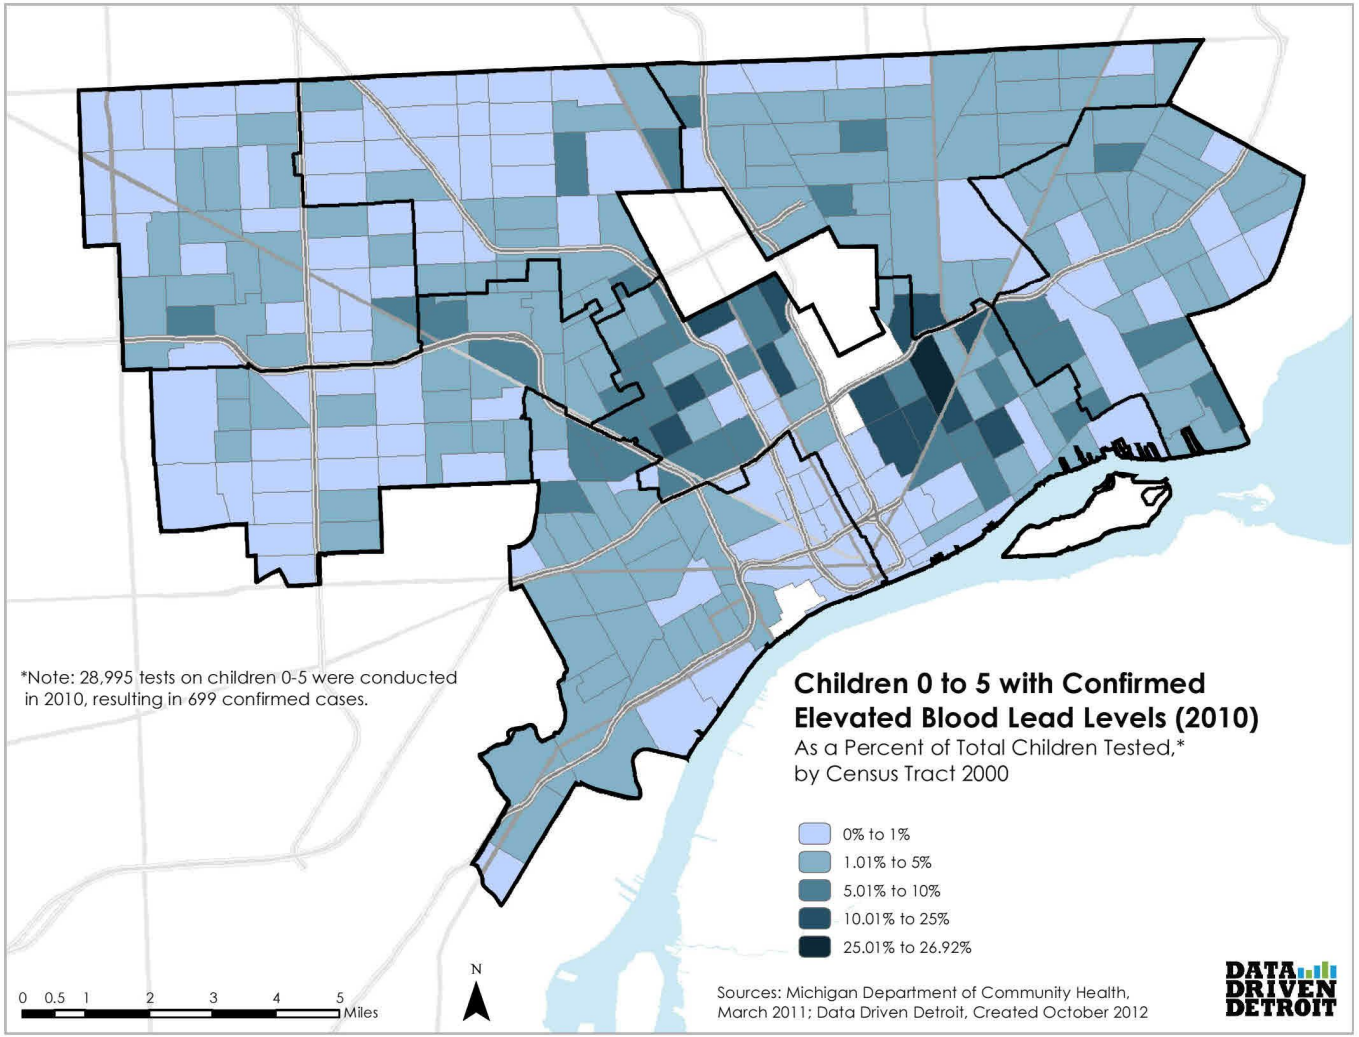
WHAT COMPONENTS MAKE A MAP?



50-YEAR LAND USE SCENARIO

- CITY CENTER
- DISTRICT CENTER
- NEIGHBORHOOD CENTER
- GREEN MIXED-RISE
- TRADITIONAL MEDIUM
- TRADITIONAL LOW
- LIVE+MAKE
- HEAVY INDUSTRIAL
- UTILITIES
- GENERAL INDUSTRIAL
- LIGHT INDUSTRIAL
- GREEN RESIDENTIAL
- INNOVATION PRODUCTIVE
- INNOVATION ECOLOGICAL
- LARGE PARK
- CEMETERY
- GREEN BUFFER

The 50-year land use scenario is built from the land use typologies. There are three major categories of land use typologies: Neighborhoods, Industrial, and Landscape. Within each of these major categories is a range of potential typologies, each providing the vision for returning vacant land to productive uses.



*Note: 28,995 tests on children 0-5 were conducted in 2010, resulting in 699 confirmed cases.

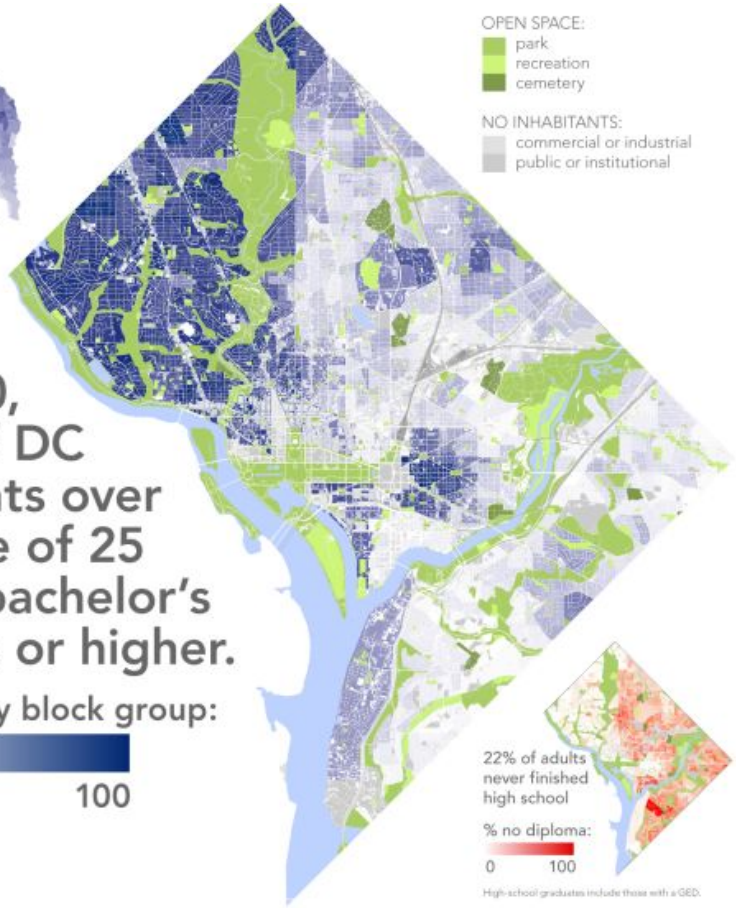
Surrounding counties

percent with degree:
Prince George's: 27%
Montgomery: 55%
Arling / Alex: 58%
Fairfax: 55%

in 2000, 39% of DC residents over the age of 25 had a bachelor's degree or higher.

percent, by block group:

0 100



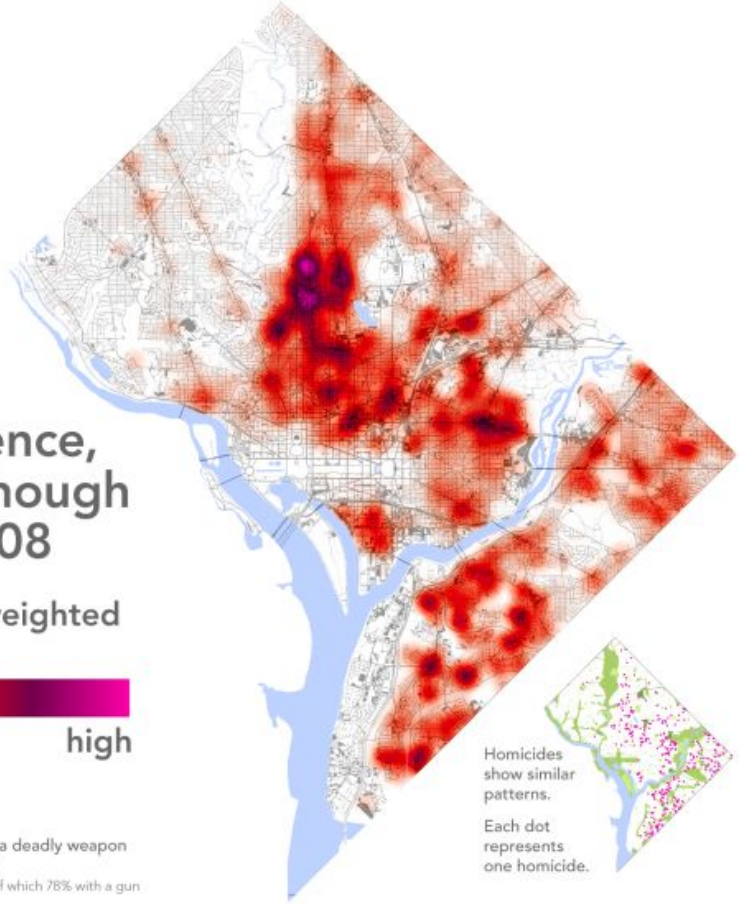
High-school graduates include those with a GED.

crimes of violence, 2006 though mid-2008

distance-weighted intensity:

low high

Of violent crimes,
53% are robberies
41% are assaults with a deadly weapon
5% are sexual abuse
2% are homicides – of which 78% with a gun



MAP ELEMENTS

TITLE - DESCRIPTIVE

DATA SOURCE

CLEAR LEGEND - WITH EXPLANATION

SCALE BAR - IN UNITS THAT MAKE SENSE]

NORTH ARROW - AT AN APPROPRIATE SIZE

ANY NECESSARY LABELS

Now, we will:

Open QGIS Desktop, and bring in our datasets.

Join our vector data and our tabular data.

Visualize variables.

Learn how to utilize the attribute table.

Learn how to export a map as a PDF/Image.
